

Security, Automation, & Low-Voltage Systems

PROFESSIONAL SYSTEM INTEGRATOR PROGRAM

Key Course Highlights

28 Days

Hands-on Practical Labs

AI-Focused

Smart Cameras & Analytics

Inherently Safe

Low-Voltage DC Circuits

Job Ready

System Integrator Skills

Module 1: Electrical & Networking

- **AC/DC Basics:** Wire staircase loops & switch boards.
- **Safety Systems:** Audit MCB, RCCB & SPD surge protection.
- **IP Networks:** Configure routers, VLAN segmentation, and subnets.
- **PoE & Fiber:** Power cameras over Ethernet and deploy SFP fiber-optics.

Module 2: Professional CCTV Systems

- **System Design:** Mount dome/bullet cameras, select lenses & calculate FOV.
- **AI Analytics:** Program face recognition, whitelists & tripwires.
- **NVR & RAID:** Set storage schedules and rebuild RAID 5 arrays.
- **Cybersecurity:** Encrypt streams, disable UPnP & secure default ports.

Syllabus Schedule Summary

Phase	Core Hands-on Competency	Earning & Career Prospects
Week 1	Basic circuit wiring, earthing checks, DMM troubleshooting, and wire LOTO safety.	Electrician apprentice, wiring technician.
Week 2	Cat6 RJ45/RJ11 crimping, switch port configuration, static IP routing, and VLAN setup.	Network installer, IT support assistant.
Week 3	Coaxial BNC wiring, NVR drive mounting, RAID storage design, and camera mounting.	CCTV installer, security technician.
Week 4	AI event configurations, face databases, ANPR barrier loops, and network cyber-hardening.	Security systems engineer, freelance systems integrator.

STUDENT ENROLLMENT & REGISTRATION FORM

Student Name:

Parent/Guardian Name:

Contact Number:

Email Address:

Preferred Batch:

☐ Morning (9 AM - 12 PM)

☐ Evening (4 PM - 7 PM)

Educational Qualification:

Parent/Guardian Signature
